

- Common design patterns list:
- User registration (if not previously registered ) / data entry (if previously registered:
    - User name (full name)
    - Email
    - Phone number
    - Address
  - Product information:
    - Product name
    - Product category (This example: baked good category)
    - Product information/description
    - Price
    - Model/SKU#/ProductID

- User pain points:
- Form is unorganized and requested data is irrelevant
  - Form is overly cluttered / requests too much information on one page
  - Product registration is not connected to user properly
  - Form labels / inputs do not properly give insight to format requirements (such as date)
